

Professionalism.

20 - Professionalism is very important for teamwork because as shown by examples in class, it is extremely difficult for people to get things done in a timely manner if they aren't being professional. The example in class didn't know how to manage his time in a professional way and so it negatively affected his entire school district because he couldn't be professional. Sharing inappropriate memes also affected him because he may get fired.

10 - A smart goal for next week is that if I have work on Saturday then i'm going to finish my homework by Friday night.

10 - Something I would do differently next week is manage my time at the gym better so that I can arrive at class on time.

20 - I taught my friend that professional workplaces do not typically like inappropriate memes to be shared by a member of their staff. My friend was confused because he sends memes into his fast food job's work group chat all the time. He learned that professional workplaces don't usually allow such behavior and will keep that in mind in the future for job opportunities.

20 - I would relate this to the gospel by relating it to behavior in church and outside of church while representing the church of Jesus Christ of latter day saints. People who are not professional at church take away from the spirit there and can drive people away from wanting to being there. While people who are professional while attending invite the spirit in and help members feel welcome.

20 - This relates to other experiences i've had. I've had to deal with non-professional teammates at school and such while working on group projects and it was very frustrating not being able to get work done due to teammates not being at school or properly communicating to the group what and why they didnt do something for the project.
